

2017-2018 Ship to Ship Transfer POAC/ Superintendent Crude Oil, Chemicals and Petroleum Products (Bulk Liquids) 3 days

This training program was created based on the 2013 OCIMF, CDI, SIGTTO and the International Chamber of Shipping publication: Ship to Ship Transfer Guide. It focuses on the training of shore based personnel such as Marine Terminal Supervisors, Marine Superintendents, Loading Masters or Expeditors and Cargo Surveyors, how to best prepare, operate, control and safely execute and complete complex On and Off Shore STS operations including so called: 'Double Banking' procedures. It helps students to understand best practices, based on many years operational experience and skill.

All over the world STS operations have become general modus operandi to avoid lengthy and often costly port stay or expensive terminal transfer over jetty charges. The knowledge obtained can be used to verify that STS operations and systems are comprehensive and promote safety and environmental excellence, with the intention of minimizing risk in the execution of their operations and providing the ability to measure and continuously improve their management systems.

Who should attend?

We invite everyone involved in running and managing Ship to Ship Cargo Transfer Operations, oil traders and vessel operators relying on STS storage and off shore marine terminals to attend this training course as it gives you the opportunity to become aware, learn, visualize, review, improve and perhaps restructure your day to day STS operations where needed.

A systematic approach such as these jointly published OCIMF, SIGTTO, CDI and Chamber of Shipping guideline is crucial to ascertain a high level of operational excellence, prevent marine pollution or damage to the environment and ensure people's safety.

Following the STS Guide, the following chapters and subjects will be addressed:

There will be 10 Sections covered:

1 General Principles

- Introduction
- Background
- Scope
- **Risk Assessment**
- Control of Operations
- Role of a ship to ship superintendent
- Person in overall advisory control
- Training and familiarization of ship's personnel
- Security

2 Conditions and Requirements

- **Ship to Ship Compatibility**
- Ship to Ship transfer operations involving vessels of a similar length
- Use of barges
- **Notification to and approval from authorities**
- MARPOL Annex 1 Cargoes
- Chemical Cargoes, Other Cargoes
- Transfer Area
- **Environmental Conditions**
- Cold Weather Precautions
- Ship to Ship operations in ice conditions
- Cargo Sloshing considerations
- **Quality assurance of ship to ship service providers**

3 Safety

- Risk Assessment of Transfer Location
- Risk Assessment of ship to ship operation
- **Personal Protective Equipment and life-saving appliances**
- **Use of Checklist**
- **Material Safety Data Sheet**
- **Gas accumulation on open decks**
- **Action in case of infringement of safety**
- **Action in case cargo of cargo leakage**
- **Safety during cargo transfer**
- **Helicopter Operations**
- Smoking and naked lights
- Earths on electrical switchboards
- Machinery operations
- Electrical isolation
- Other places where electrical arcing may occur

- Use of radio and satellite communication equipment
- Automatic identification systems
- Use of Radar
- Readiness of fire-fighting equipment
- Electrical Storms
- Galley Stoves
- Accommodation openings

4 Communications

- **General Communications, Language**
- **Pre-arrival communications**
- Information required from the ships
- Advice to be given to the ships by the ship to ship organizers
- **Navigational warnings**
- **Communications during approach, mooring and unmooring**
- **Communication during cargo operations**
- **Procedures for communications failure**

5 Operational preparations

- **Joint plan of operation**
- **Preparation of ships**
- Lightering / STS support vessels
- Navigational signals

6 Manoeuvring and mooring

- Basic Principles
- Manoeuvring alongside at sea with two ships under power
- General Advice for controlling two ships
- Advice for manoeuvring alongside
- Manoeuvring a combined two ship system to anchor
- Underway transfer
- Manoeuvres with one ship at anchor
- Manoeuvring for in port operations
- Manoeuvring with one ship alongside a terminal
- Mooring operations
- Mooring plans
- Mooring analysis
- At sea mooring operations
- Efficiency of ship to ship mooring systems
- In port mooring operations

7 Procedures Alongside

- **Pre-transfer procedures**
- **Responsibility for cargo operations**
- **Planning for cargo transfer**

- **Cargo Transfer – general guidance**
- Vapour balancing – general considerations
- Vapour balancing consideration before commencing cargo transfer
- Vapour balancing considerations during cargo transfer
- Vapour hose considerations
- **Operations after completion of cargo transfer**
- Bunkering and storing

8 Unmooring

- Unmooring Procedure
- Unmooring after underway transfer
- Unmooring while one ship is at anchor
- Unmooring from a ship alongside a terminal
- Unmooring using quick release arrangements

9 Equipment

- **Fenders**
- Fenders used for sea transfers
- Reference guide for fender selection for sea transfers
- Fender requirements
- Fenders used for in port transfers
- Low pressure fenders
- Foam filled fenders
- **Cargo Transfer Hoses**
- Hose standards
- Hose length
- Pressure ratings and flow velocities
- Hose handling
- Hose connection
- Hose inspection and testing
- Marking
- **Mooring Equipment**
- **Personnel transfers – at sea operations**
- Suitability of lifting equipment
- **Personnel transfers – in port operations**
- Lighting
- Ancillary equipment for ship to ship operations
- Equipment noise levels

10 Emergencies

- Contingency planning and emergency response procedures
- Emergency signal
- Emergency situations
- Examples of potential emergencies
- Emergencies during manoeuvring

- Procedures in the event of gas accumulation on deck
- Accidental cargo release
- Shipboard Oil Pollution Emergency Plan, Shipboard Marine Pollutions Emergency Plan (SMPEP) and Vessel Response Plan (VRP)
- State of Readiness for an emergency
- Cessation of transfer operations as a precautionary measure

As the class will be interactive ,open discussion are encourage and more in-depth information on the following subjects are offered

- additional procedures for ship to ship transfer on: MARPOL Annex I (Crude oil and Petroleum products)
- MARPOL Annex II (chemicals)
- Liquefied Petroleum Gas Cargoes (LPG)
- Liquefied Natural Gas Cargoes (LNG)
- Example of LNG ship to ship transfer compatibility questionnaire.
- Operational / Safety Checklists for STS
- Example safety checklist for personnel transfer by crane
- Example checklist for transfers involving vapour balancing
- Fender selection calculation
- Reverse lightering operations
- Hose connection guidance, assembling a hose string
- Guidance om risk assessment processes

11 Emergency Preparedness (in cooperation with local, regional or national authorities)

- Emergency response plan
- Spill response plan
- Emergency evacuation plan
- Emergency training

12 Management Systems Review

- Audit plan to address management of all terminal activities
- Standard audit format and process
- Training and qualification requirements auditors
- Monitoring of audit finding to close-out
- Management review of findings

13 Operations at Buoy Moorings

- Establish planning, operational practices and procedures to ensure safe mooring
- Compliance with established standards and accepted industry guidance
- Compatibility of area and size of vessels
- Suitability and capability of support crew and craft
- Monitoring vessel position in relation to the buoy

14 Terminals Impacted by Ice or Severe Sub-Zero Temperatures

- Plans, procedures associated with the operating conditions
- Trained and prepared personnel
- Suitability of fire-fighting, life-saving and first aid equipment
- Selection of vessels for operating in anticipated conditions
- Ice forecasting and weather reports
- Emergency and spill response

Course Instructor

Arend van Campen, MA, MEI, Tank Terminal Training

Arend van Campen is a committee member of the Dutch Branch of the Energy Institute. Arend has worked for over 30 years as a Marine Cargo Expediter and Loss Prevention Advisor around the globe including Amsterdam, Rotterdam and Antwerp for a number of clients such as Shell, BP, Exxon, Pertamina, Q8 Petroleum, Gulf Nederland, Vopak, Cargill, Amfert, Mobil and Petroplus.

He started his career as a deckhand on tanker barges in Holland in 1977. After a few years, and serving in the Dutch Air force, he joined Saybolt to pursue an international career in cargo surveying and superintendence. He spent 2 years in Skikda, Algeria where he worked under extreme circumstances and learned to protect client's interest to the fullest. At the end of 1984, he joined Oil Inspections and worked for them as a Loss Control Marine Superintendent until the end of 1987 when he decided to start his own company PSA, which to date still operates under this name in Algeria and Africa, although he no longer participates. PSA worked as a major contractor of tank terminal operations

He worked in Indonesia where he was the key Loss Control and Supply Chain Advisor to the Pertamina board of directors until 2008. There he taught and trained operational personnel and set up an efficiency program to eliminate and control operational losses such as demurrage, quality and quantity discrepancies and S&W - free water issues.

After that, he returned to Amsterdam where he was contracted by MAIN BV (Gulf Oil Nederland) to manage their slop oil recovery plant. At present, he runs Tank Terminal Training offering varied training programs for the energy industry. TTT has been officially recognized by the Energy Institute as an approved learning provider.

Arend holds a Master's degree in Business Ethics & Social Responsibility and teaches that a safe, sustainable and profitable business can thrive only when people choose and act ethically. He set up 'CREAZENE', a research institute focusing on a sustainable future for human well-being and the preservation of the environment.

We make people better!
